Princeton, NJ | 732-309-5089 | adityaamagesh@gatech.edu | linkedin.com/in/adityaamk | U.S. Citizen

EDUCATION

Georgia Institute of Technology | Atlanta, GA

Graduation: May 2025

Integrated BS/MS in Computer Science, GPA: 3.95/4.0

Faculty Honors, Taco Bell Live Mas Scholarship Recipient

EXPERIENCE

Amazon Web Services - Amazon Connect

May 2023 – August 2023

Software Engineer Intern - Agent Experience Team

New York, NY

- Made automation tool to help engineers resolve tickets faster by eliminating 2+ hours of manual work per ticket.
- Used TypeScript and various AWS services like Lambda, CloudWatch, CW Synthetics, S3 buckets, EventBridge, internal APIs, and AWS CDK to build backend automation service and deploy on all production regions.
- Code to be added to organization-wide Amazon Connect project that will automate workflows to revamp on call.

ServiceNow

May 2022 – August 2022

Software Engineer Intern - Employee Workflow Org

San Diego, CA

- Used AngularJS and Rhino to add celebratory modal features to ServiceNow's employee management platform, used by 1000+ corporate customers to manage millions of employees.
- Displayed custom modal 125% faster than prior iterations by improving query efficiency.
- Wrote Selenium scripts to perform automated tests on features before pushing to production.

Waterfall: NFT Price Discovery

February 2022 – May 2022

Software Engineer Intern

New York City, New York

- Built REST API using Django REST framework & Alchemy's NFT API to assemble and modify NFT data.
- Parsed JSON data from API calls to store 100,000+ NFT assets and collections in PostgreSQL database, allowing for 250% faster querying from frontend.

CS 1331: Object-Oriented Programming

January 2022 – May 2022

Teaching Assistant

Atlanta, GA

- Designed 10+ homework assignments and corresponding JUnit tests, and graded exams.
- Held office hours for 200+ students, helping students debug code and providing guidance on course concepts.

Public Herald

June 2020 – March 2021

Software Developer

Pittsburgh, PA

- Created visualizations detailing transport of fracking waste in PA waterways with Leaflet.js and ArcGIS.
- Showcased by actor & environmentalist Mark Ruffalo on BBC News and shared on social media.

PROJECTS

GT Basketball Intelligence Research Team | React.js, Node.js, Chart.js

August 2021 – Jan 2023

- Programmed full-stack web application using Node.js and React.js to monitor player performance and recovery.
- Parsed 100+ CSV files of basketball player data into JSON and created data visualizations using Chart.js.

2020protests.com | Python, Node.js, ArcGIS

June 2020 – September 2020

- Developed website to combat racial injustice by providing important info about donating, protest locations & safety, curfews, petitions, and educational resources using Node.js, HTML/CSS, and Python.
- Wrote scripts to scrape protest and COVID-19 data for all 50 states, and daily updated data during protests.
- Mapped worldwide protest locations and data into an ArcGIS visualization, making information more accessible.
- Reached 250k+ users and 2 million+ total visits, and featured on USA Today, GeekWire, NBC's King5, CNET, University of California Institute for Prediction Technology, MIT Technology Review, etc.

Data Science at Georgia Tech | JavaScript, Google Apps Script

August 2021 – May 2022

- Created automated directory to track member engagement in data science bootcamp using JavaScript and Google Apps Script platform.
- Programmed custom functions and macros in Google Sheets, reducing 2+ hours-worth of data entry to seconds.

TECHNICAL SKILLS

Languages: Java, Python, SQL (Postgres), JavaScript, TypeScript, HTML/CSS, C#, C/C++

Frameworks: React.js, AngularJS, Node.js, Flask, OpenMPI, JUnit

Developer Tools: AWS, Git, Github, Jira, Asana, Docker, VS Code, Android Studio, PyCharm, IntelliJ, Unity
